Foreword

I am delighted to learn that Bangladesh Bureau of Statistics (BBS) has successfully completed the 'District Statistics 2011' under Medium-Term Budget Framework (MTBF). The initiative of publishing 'District Statistics 2011' has been undertaken considering the importance of district and upazila level data in the process of determining policy, strategy and decision-making. The basic aim of the activity is to publish the various priority statistical information and data relating to all the districts of Bangladesh. The data are collected from various upazilas belonging to a particular district.

The Government has been preparing and implementing various short, medium and long term plans and programs of development in all sectors of the country in order to realize the goals of Vision 2021. For any pragmatic approach in formulating and evaluating development plans and programs reliable statistics are indispensable. BBS has been performing the major responsibility of supplying comprehensive and accurate statistics at the national level.

The present government, in line with its commitment to decentralize administration, has declared upazila as the focal point of administration regenerating upazila parishad through participatory elections. However, upazila level official statistics are still very inadequate. It is praiseworthy that BBS has undertaken timely program of publishing 'District Statistics 2011' where data representing socio-economic characteristics of upazilas of all districts will be available. I am confident that this publication will be of invaluable help to the planners, administrators, researchers, field level officers as well as other users. Various government, non-government and international organizations closely related to policy formulation and implementation may also find this publication useful.

I sincerely thank Mr. Golam Mostafa Kamal, Director General, BBS for bringing out the publication of 'District Statistics 2011'. I hope that in future 'District Statistics' will be published in much more improved form to make it more effective and informative.

Preface

The 'District Statistics 2011' is mainly a compilation work of Bangladesh Bureau of Statistics (BBS). The decentralization policy of government has enhanced demand for timely, qualitative and comprehensive statistical data both for administrative and development requirements. The major regular publications of Bangladesh Bureau of Statistics like Statistical Pocketbook of Bangladesh, Statistical Yearbook of Bangladesh and Agricultural Yearbook of Bangladesh provide aggregate data mainly at the national and regional level. Data for smaller administrative unit like upazila often remains absent in such publications. The 'District Statistics 2011' emphasises to provide upazila level data.

The 'District Statistics 2011' provides both structural and flow-type information of almost all of the priority sectors of our national economy depending on data availability both from published and unpublished sources.

The publication of 'District Statistics 2011' would have not been feasible without the wholehearted co-operation of the various government, semi-government, autonomous, non-government offices and other organizations. In particular, the district and upazila level officials extended their total support and supplied all data. I like to express my sincere thanks to them and hope such co-operation will continue in future.

I am obliged and grateful to Mr. Md. Nojibur Rahman, Secretary, Statistics and Informatics Division (SID) for his enormous support and advice to prepare and to finalize this important publication. My sincere thanks also go to all officers of SID for their wholehearted support and sincere co-operation towards accomplishing this document.

I acknowledge the contributions of Mr. Md. Mizanur Rahman, Deputy Director General, BBS and Mr. Ghose Subobrata, Director, FA & MIS, BBS during development of the Document.

The regional and upazila statistics officers of BBS actively participated in preparation of the report. I thank them all. Finally, I thank Mr. Iftekhairul Karim, Focal Point Officer and Mr. Nasir Uddin Ahmmed, Deputy Director & Ex.Focal Point Officer as well as staff members of Bangladesh Bureau of Statistics for their untiring efforts in making the 'District Statistics 2011' a success. Through user's interaction and feedback, we hope to improve the coverage and quality of information contained in this edition. Any suggestion for improvement of the publication will be highly appreciated.

Acknowledgement

The report on 'District Statistics 2011' is the result of the initiative of the honorable Secretary, Statistics and Informatics Division (SID). Ex-Director General Mr. Md. Shahjahan Ali Mollah and the present Director General Mr. Golam Mostafa Kamal of Bangladesh Bureau of Statistics (BBS) have guided us in every steps of the journey to whom we remain grateful.

All the data providers of different offices/organizations of respective district and upazila deserve special thanks for their cooperation. We will be in need of such cooperation in future too and hope that the same hospitality will be received from them again.

I gratefully acknowledge the contribution of all members of Editors' Forum and also of Project Directors' Forum of BBS in editing this compilation work.

I acknowledge the contribution of Begum Aziza Parvin, Director, Computer Wing, Mr. Md. Mofizul Islam, Programmer and the members of data entry team.

I would like to thank Mr. Iftekhairul Karim, Focal Point Officer for his rigorous exercise and valuable contribution in bringing out this publication. I also acknowledge the hard work of Mr. Nasir Uddin Ahmmed, Deputy Director & Ex-Focal Point Officer for this activity. My sincere thanks also go to the respective Regional Statistical Officers, Upazila Statistical Officers and the employees of BBS.

I acknowledge the work of Mr. Md. Abdul Mannan, Administrative Officer, Mr. Mohammad Abdullah, Assistant Statistical Officer, Mr. Md. Monzurul Islam, Assistant Statistical Officer and Mr. Md. Yeasin Miah, Statistical Investigator for their sincere assistance to the Focal Point Officer in many possible ways. Officers and staff of Reproduction, Documentation and Publication Section of FA & MIS have contributed in printing the report in possible shortest time.

Finally, I want to be submissive that this work of compiling data from various secondary sources at district and upazila level is undertaken after a long time gap of almost 25 years. Some errors or unwilling mistakes may remain there in spite of our full hearted endeavor to make it an error free publication. It will be highly appreciated if any user kindly communicates any shortcomings of the report.

CHAPTER 1

Introduction

District at a Glance

Background: Thakurgaon is a Barandra district, situated on the northern part of Bangladesh. Nothing is definitely known about the origin of the name of the district. It is learnt that there lived an influential **Thakur** (Hindu priest) family in this locality. It is generally believed that the name of the district 'Thakurgaon' might have been derived from the above word *Thakur*.

Geographic Area and Location: Thakurgaon is bounded on the north by Panchagarh district, east by Panchagarh district and Dinajpur district, south and west by West Bengal State of India. It lies between 25°44' and 26°19' north latitudes and between 88°44' and 88°39' east longitudes. The total area of the district is 1809.52 sq. km of which 6.43 sq. km is riverine and 9.06 sq. km. is under forest.

Administration: Thakurgaon subdivision was created in 1860 under Dinajpur Zila. It was upgraded to a district in 1984. The district consists of 5 upazilas, 51 unions, 638 mauzas, 641 villages, 3 paurashavas, 30 wards and 59 mahallas. The upazilas are Baliadangi, Haripur, Pirganj, Ranishankail and Thakurgaon Sadar.

Township: Thakurgaon Municipality was established in 1958. It was renamed as Thakurgaon Paurashava in 1977. The area of the Paurashava is 30.03 sq. km. It consists of 12 wards and 30 mahallas.

Archaeological Heritage and Relics: Among the archaeological heritages, residence of Raja Tonkanath (Malduar), Rajbari of Raja Jagendra Narayan, Rajbari of Raja Ganesh, Jagadal Rajbari, Bangla Garh, Sangaon Shahi Mosque, Fatehpur Mosque, Jamalpur Mosque, tomb of Syed Nasir Uddin, tomb of Pir Sheikh Sirajuddin, tomb of Hazrat Adam (R), Govinda Jeo Mandir (eighteenth century), Shiva Mandir at Haripur Rajbari, Goraksanath Mandir, Katihar Hat Shyamrai Mandir, Ramrai Dighi, Khunia Dighi, Adhar Dighi, Shapla Dighi and Rani Dighi are the notable.

Marks of the War of Liberation: There are 4 mass killing sites and 6 mass graves of the martyrs which bear the testimony of the War of Liberation in Thakurgaon district.

Temperature and Rainfall: The annual average temperature of the district varies from maximum 33.5°C to minimum 10.5°C and the average annual rainfall of the district is 2536 mm.

Main Rivers: The principal rivers of the district are Tangon, Punarbhaba, Nagar and Tentulia.

Flora and Fauna

Flora: The soil consists of a sandy mixed, towards the north, with gravel. This goes by the name pali. The district is located in the northwest part of Bangladesh and its entire western boundary line borders West Bengal (India). Amongst these, the most conspicuous are the banyan (*ficus benghalensis*), the peepul (*ficus religiosa*), the pakur (*ficus infectoria*), the shimul or cotton tree (*Bombax ceiba*), the neem (*Azadirachta indica*), the mango (*magifera indica*), the Jack fruit (*Artocarpus hetrophyllus*), the babla (*Acacia nilotica*), Jam or black berry (*Syzygium cumini*), guava (*Psidium guajava*), banana (*Musa sapientum*), bel (*Aegle marmelos*), tamarind (*Tamarindus indica*), palash (*Butea monosperma*) and hijal (*Barringtonia acutangula*) trees are also seen in abundance everywhere in the district. The villages are embowered in greenery; clumps of wild bamboos are to be seen on all sides and the banks of the rivers and old tanks are overgrown with thickets of shrubs and brambles. The palm (*Borassus flabellifer*) and date-palm or khejur (*Phoenix sylvestris*), debdaru (*Polyalthia longifolia*) are much in evidence and give a distinctive note to the scenery. In parts of the district, especially in the neighborhood of some of the large beels, stretches of grass jungle are found. In the marshes some varieties of reed grow which are used for various purposes, the ikra (*Saccharum arundinaceum*) which, when set upright and plastered with mud, makes an excellent house wall. The nagormutha, a species of tall sedge with a triangular blade stem is used for making sleeping mats; the khaskhas (*Andropogon muricatus*), a plant with an odorous root used for making screens, which, when moistened form a pleasant protection against the west winds of the hot season. The sunny-grass, called in the vernacular chhan is used for thatching. The nal kharga (*Phragmites karka*) a species of tall with a feathery top, and the sola (*Aeschynomene aspera*), from whose root a fine white pith, greatly used for making sun helmets (Sola hat), floats for fishing nets, and for making toys is obtained are common in many of the old tanks and marshy places. The finest trees in the district are undoubtedly the figs.

A few varieties of bamboo is plenty is common in the district and utilized for so many purposes. Of these, borak bamboo (*Bambusa* sp.) is the largest most valuable and most generally planted. It is used for posts, rafters, beams and sometimes for firewood. Another valuable bamboo is the jati bans, which provide valuable materials like battens, crosspieces etc. for building houses. The muli bans is chiefly employed in making mats and baskets. The jack fruit (*Artocarpus heterophyllus*) is another well known variety and is utilized in making fence and spear shafts.

Two species of cane, a thick and a thin variety are found in the district in woods and in thickets near villages where the soil is sufficiently rich and moist. The thin variety is employed for baskets and wicker work. The thick variety is not much used.

The district does not possess many low-lying areas, beels or marshy places and thus the aquatic flora are not so rich compared to other districts of Bangladesh. However, the water lilies, lotus, *vallisuaris elodea* species are commonly met with in ponds, tanks and shallow stagnant river.

Mehogany (*Swietenia macrophylla*), jack-fruit (*Artocarpus heterophyllus*), mango (*Mangifera indica*), debdaru (*Polyalthia longifolia*) etc. are usually planted along road sides and are the common source of timber. Besides these sal (*Shorea robusta*) trees are grown in different parts of the district and kept as reserve forest areas.

Fauna : It appears from old records that till the end of the 19th century, the district had a rich mammalian fauna. Tiger (*Panthera tigris*) and leopard (*Panthera pardus*) were widely distributed and other cats like jungle cat (*Felis chaus*), fishing cat (*Felis viverrina*) and leopard cat (*Prionailurus bengalensis*) were also very common in the district. Other mammals like barking deer (*Muntiacus muntjak*), hog deer (*Axis porcinus*), badger (*Arctonyx collaris*), Jungle cat (*Felis chaus*), wild boar (*Sus scrofa*), rhesus monkey (*Macaca mullata*) etc. were also common in the district. But with the passing of time and following the destruction of forest and jungles for cultivation there has a rapid decline of the mammalian fauna especially from the beginning of the 20th century.

Leopards are still seen in many parts of the district as they can get cover in the neighbourhood of villages in old graveyard, ruined remains of temples, mosques and dwelling houses. Mammals still occurring in the district include mongoose (*Herpestes edwardsi*), fishing cat (*Prionailurus viverrinus*), rabbit (*Oryctolagus cuniculus*), jackal (*Canis aureus*), fox (*Vulpes bengalensis*), fruit bat (*Pteropus giganteus*), rat (*Mus musculus*), bat (*Rousettus leschenaultia*) etc.

Although the bird population has also been affected by the disappearance of its natural habitats, there are still a large number of birds in the district. The birds of the district include vultures of different kinds of doves. Amongst water birds, the most important are the common coot, the moorhen and several kinds of herons and cranes. As regards reptiles, snakes are fairly common the poisonous varieties being the karati, cobra (*Naja naja*), the banded karait (*Ophiophagus hannah*) and the python (*Python molurus*) are also occasionally found.

The district was at one time famous for its fish and was known as fish country. The fish supply in the district is now imported from outside, the local supply of fish is now nominal and this include ruhi (*Labeo rohita*), katla (*Catla catla*), mrigel (*Cirrhinus mrigala*), boal (*Wallago attu*), magur (*Clarias batrachus*), pabda (*Ompok pabda*), shoil (*Channa striatus*), taki (*Channa punctatus*) and koi (*Anabaste studineus*).

Concepts and Definitions

1. Population and Housing Census 2011

The population and housing census is the unique source of reliable and comprehensive data about the size of the population of the country, major socio-economic and socio-demographic characteristics.

It is the total process of collecting, compiling, evaluating, analyzing and publishing or otherwise disseminating demographic, economic and social data pertaining, at a specified time, to all persons in a country. The essential features of a population census are individual enumeration, universality within a defined territory, simultaneity and defined periodicity.

The population and housing census provides information on the geographic and administrative distribution of the population and household in addition to the demographic and socioeconomic characteristics of all the people in the country. The data from the census are classified, tabulated and disseminated so that political leaders, election officials, planners, national organizations including NGOs and civil society, regional and international organizations can use the data in decision-making.

The purpose of community report is to disseminate census data by communities (ward/mahalla in urban area and union/mauza/village in rural area). Data on all key variables namely area, household, population by sex and age group, ethnic population, literacy rate, marital status, school attendance, employment status and religion as well as physical facilities such as source of drinking water, sanitation, electricity and dwelling units have been presented in this report. The planners, researchers and policy makers as well as development partners and community administrators will find this report as a valuable reference for use in advising plans and programs for advancing welfare and well-being of the common people, in particular and the community in general.

Household

Persons, either related or unrelated, living together and taking food from the same kitchen constitute a household. A single person living and eating alone forms one-person household.

Literacy

It denotes ability to write a letter in any language. Literacy status assessment is made for population 7 years and over.

Community

It refers to the following five lower geographic, administrative or revenue units:

- i) **Union:** Smallest administrative rural geographic unit comprising of mauzas and villages and having union parishad institution.
- ii) **Mauza :** Mauza is the lowest administrative unit having a separate jurisdiction list number (J.L. No.) in revenue records. Every mauza has its well-demarcated cadastral map. Mauza should be distinguished from local village since a mauza may consist of one or more villages.
- iii) **Village:** Lowest rural geographic unit either equivalent to a mauza or part of a mauza.
- iv) **Ward:** Smallest administrative urban geographic unit comprising of mahallas and having ward council institution.
- v) **Mahalla:** Lowest urban geographic unit having identifiable boundaries.

Urban Area

It corresponds with area developed around a central place having such amenities as metalled roads, improved communication, electricity, gas, water supply, sewerage, sanitation and also having comparatively higher density of population with majority population in non-agricultural occupations.

- i) **City Corporation:** It includes city corporation area declared by the Ministry of Local Government.
- ii) **Paurashava/Municipality Area:** It includes paurashavas incorporated and administered by local government under Paurashava Ordinance, 1977.

2. Agriculture Census year and reference period

The census year extends over twelve consecutive months having for different census items the different reference periods or days of data collections. Some items have a year or week reference period. Some others have a specific reference day.

The census year covered twelve months from 1 Baishak to 30 Choitra, 1414 Bangla Shal (BS). The year was the reference period for such census items as operated land use, crops, agriculture employment, livestock & poultry deaths and agriculture loan. A single reference day was used for items like holdings, farm size, land tenure, farm population, livestock & poultry inventories and agriculture implements.

The different census items by their reference periods or days are shown below:

Agriculture holding

An agriculture holding is a techno-economic unit of agricultural production under single management comprising all livestock kept and all land used wholly or partly for agricultural production purposes without regard to title, legal form or size. Single management may be exercised by either an individual holder or jointly by two or more individuals or holders or by a judicial person such as a corporation, co-operative or government agency. A holding may consist of one or more parcels (fragments of land) located in one or more areas or mauzas or in more than one administrative unit or division provided that all separate parcels of fragments form parts of same technical unit under operational control of same management.

The definition covers practically all holdings/households engaged in agricultural production of both crops and livestock. Some agriculture holdings may have no significant agricultural land, e.g. holdings keeping livestock, poultry and hatcheries for which land is not an indispensable input for production.

Farm holding

A farm holding is defined as being an agricultural production unit having cultivated land equal to or more than 0.05 acres. Farm holdings are classified into following three broad groups:

- (a) **small:** Farm holdings having minimum cultivated land 0.05 acre but operated land more than this minimum but upto 2.49 acres.
- (b) **medium:** Farm holdings having operated land in between 2.50 to 7.49 acres.
- (c) **large:** Farm holdings having operated land 7.50 acres and above.

Small cultivated land 0.04 acre or less is generally used for kitchen garden growing mainly vegetables. Often seeds of white gourd, water gourd, pumpkin and other strains are sown on households; but these creepers spread out around house roofs and other structures. As such, the minimum cultivated land considered for qualifying to be a farm holding is 0.05 acres.

Non-farm holdings

A non-farm holding is defined as being the one which has neither cultivated nor operated land or has cultivated land less than 0.05 acre.

Tenancy

Owner holdings are those having and operating their owned land and who may or may not be leasing out land.

Tenant holdings are those having no owned land but operating land taken from others on share cropping basis or on other terms.

Owner-cum-tenant holdings are those having owned land and who may or may not be leasing out their own land to others and who may be taking land from others on share cropping basis or on other terms.

Agriculture work

Agriculture work signifies all activities of holder and his/her labour force doing planning, management, and operation of a holding. It includes land preparation, sowing, weeding, harvesting, feeding and tending livestock & poultry, kitchen gardening, supervising agricultural workers, keeping farm records & accounts, preparing agriculture products for marketing (including packaging), repairing farm equipment, constructing farm buildings & fences, and engaging in land reclamation and improvement and other related activities. It excludes home and other family domestic chores.

Area under pond

The pond area remains under water almost through out the year. Normally, households use pond water for various domestic and sometimes agriculture purposes. Ponds are also generally used for fish culture.

In the census the pond area data were collected separately for both single ownership and joint ownership of households.

Area under temporary crops

It is the land area planted to crops having growing cycle or length of life less than one year. These are the temporary crops such as paddy, wheat, jute, cotton, tobacco, sugarcane, pulses, oil seeds, potato, vegetables and other seasonal crops. A list of temporary crops for which data were collected separately was given in back page of "Tally Sheet". The minimum area recorded for a temporary crop was 0.01 acre. Area under temporary crops and temporary-crops net area are equivalents.

Area under permanent crops

It is the land area planted to crops which remain standing for a long period of time and do not need to be replanted after a seasonal harvest. Mango, jackfruit, coconut, guava, lemon, and other fruit varieties are all permanent crops.

Current fallow

It is land brought into cultivation but left out uncultivated in census year for fertility regaining and improvement or for other reasons.

Net cultivated area

This is land area actually cropped during the census year regardless of number of crops grown plus current fallow. It includes areas under temporary and permanent crops and also current fallow.

Permanent fallow

It is land not available for cultivation due to coming into residence and commercial & other uses. Play ground, graveyard, wild shrubs and jungles, marshy land, and the like fall in this category.

Irrigated area

This is area of total land brought under irrigation coverage for growing crops with irrigations done through mechanical or manual means. Irrigated area classifications fall into two categories: (1) surface water irrigation with main water sources being rivers, canals, beels, ponds, and other water bodies; and (2) underground water irrigation with water lifted by shallow tube-wells, deep tube-wells, and country traditional devices. The irrigation equipments are run by electricity, diesel or petrol, or manual labour.

Cattle and Buffalo

Cattle and buffalo heads owned by households on day of enumeration were counted.

Goats and Sheep

Goats and sheep owned by households on day of enumeration were counted.

Fowls, Ducks and Pigeons

Fowls, ducks and pigeons owned by households on day of enumeration were counted.

Temporary crops gross area

Areas aggregated for all temporary crops grown in the census year have made **temporary crops gross area** greater than **temporary crops net area** since the latter has within it the same land cropped more than once in different seasons of a year.

Intensity of cropping

It is percentage of temporary crops gross area in comparison with temporary crops net area. It is expressed as follows:

$$\text{Intensity of cropping} = \frac{\text{Temporary crops gross area}}{\text{Temporary crops net area}} \times 100$$

Cereals

Main cereals are rice and then wheat. Other cereals are jab, barley, cheena, maize, kaun, bajra and joar.

Pulses

Main and common pulses are gram, mung, lentil, arhar, gari kalai, khesari and pea.

Oil seeds

Main oil seeds are rape and mustard, sesamum, linseed, groundnut, soybean, sunflower and castor.

Vegetables

Farmers grow both summer and winter vegetables. Main vegetables are potato, brinjal, raddish, arum, lady's finger, cauliflower, cabbage, bean, tomato, patal, gourd, cucumber, pumpkin, knoll-kal-turnip, dhundal, barbati, khirai, chichinga, carrot, kakrol and sak.

Cash crop

Main cash crops are jute, mesta, sunhemp, cotton, sugarcane and tobacco.

Spices

The main spices include turmeric, ginger, chillies, onion, garlic, corriander, black cumin and ani seed.

Fuel crops

Dhaincha and other smaller plants used as cooking-fue
